DEMOLISH DOWNTIME IN TOUGH INDUSTRIES

Our belief is that the hydraulic cylinders used in Oil, Gas & Water Drilling need to be built to meet the specific requirements of the industry. **No shortcuts!** Talk to us about your specific application and our experts will recommend the correct cylinder to meet even the harshest environments, including cold arctic weather. Oil, Gas & Water drilling requires a hydraulic cylinder that performs perfectly over the long haul, demolishing downtime, even in harsh, remote locations.

DELIVERING POWER & PERFORMANCE

We understand the rigorous safety and productivity requirements involved in drilling, so everything we sell is available only after approval by our team of industry experts. Drilling is a tough business and each of our premium hydraulic cylinders is intended to compliment the sturdy equipment you use in drilling, enabling consistent results over time. The success of Oil, Gas & Water drilling relies on **industry experts** who recommend the correct hydraulic cylinders that will deliver both power and performance.

TOUGH INDUSTRIES ***REQUIRE CYLINDER EXPERTS***

Tough industrial applications like Oil, Gas & Water drilling require more than just tough hydraulic cylinders; it's got to be the correct cylinder too. Our cylinders are designed specifically to **Demolish Downtime** in the drilling industry. We stock cylinders created specifically for the Oil, Gas, and Water drilling industry; powerful, durable, and efficient. Extensive testing is also at your service. ASME, DNV, BV and ABS certifications and product traceability are all part of what we do. No shortcuts!
